How do I Download an Addon or Plugin?

FAQs · https://wpemailmanager.com/docs/how-do-i-download-an-addon-or-plugin/

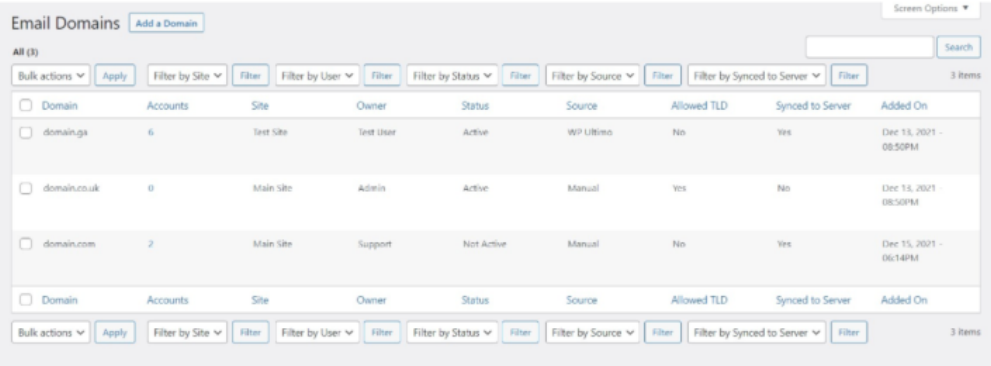

I purchased a license before February 7, 2022

If you purchased a license before February 7, 2022, you ***may*** qualify getting an addon at no additional cost. To download, ensure that you are logged in, visit any plugin's page, scroll to the bottom section and enter your license key.

I purchased a license after February 7, 2022

If you purchased any of our plans after February 7, 2022, visit any plugin's page and click on the download button.

Single Site – $39.00 *Billed once per year until cancelled*

Unlimited Sites *Billed once per year until cancelled*

Lifetime License – $149.00

Download

Current Version: 0.0.2

View Documentation

Please Note: If you use WP Ultimo, this addon may not be required, but it adds more enhancements to email domain management.

The domain domain manager addon enables:

1. Users to add/remove their domains to/from your email server to facilitate email account management. If the Custom Server Configuration addon is enabled in a subsite, the domains are added/removed to/from the subsite's email server, and not the network's email server. When
