How to Enable API Access in Cyber Panel

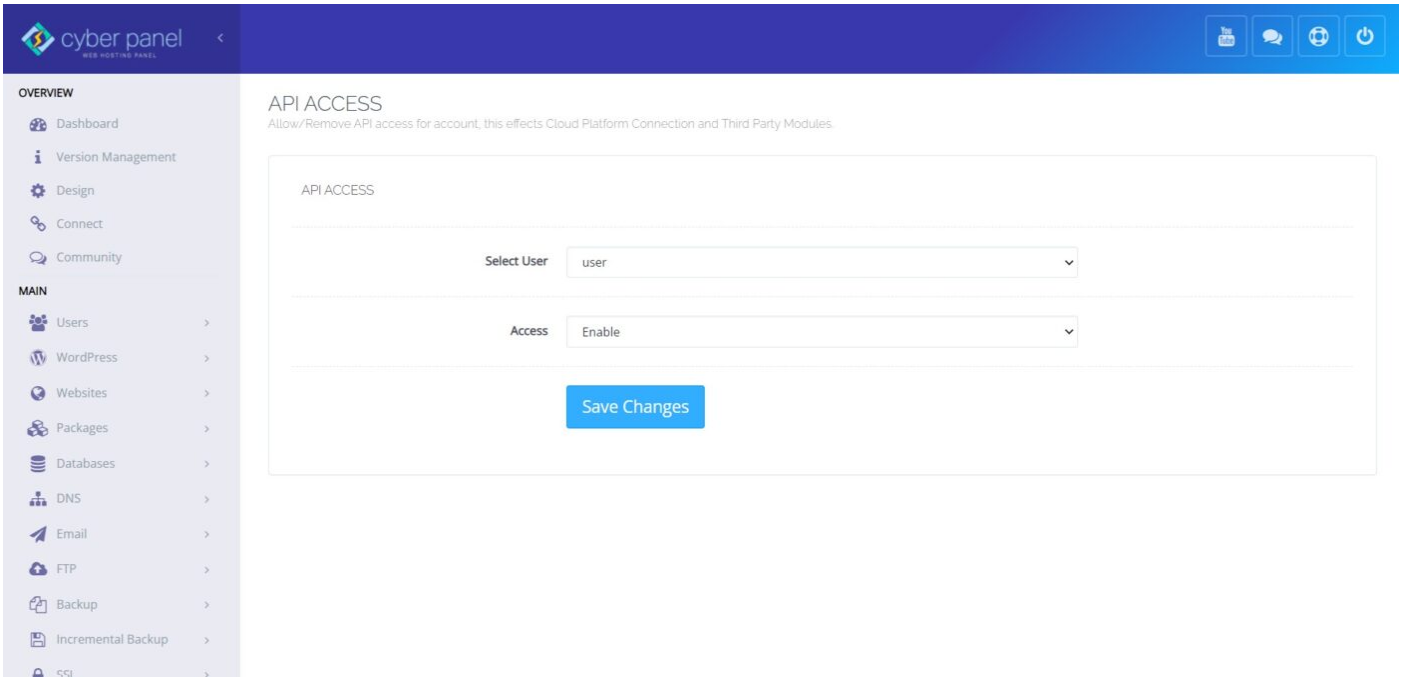

CyberPanel · https://wpemailmanager.com/docs/how-to-enable-api-access-in-cyber-panel/

Only admins can access Cyber Panel's API. To enable API access for an admin user in Cyber Panel do the following:

1. Login to Cyber Panel's admin area, and in the Users drowndown, click on API Access.

2. In the API Access page, select a user and enable their API access.
