How to Enable the Email Server on TinyCP

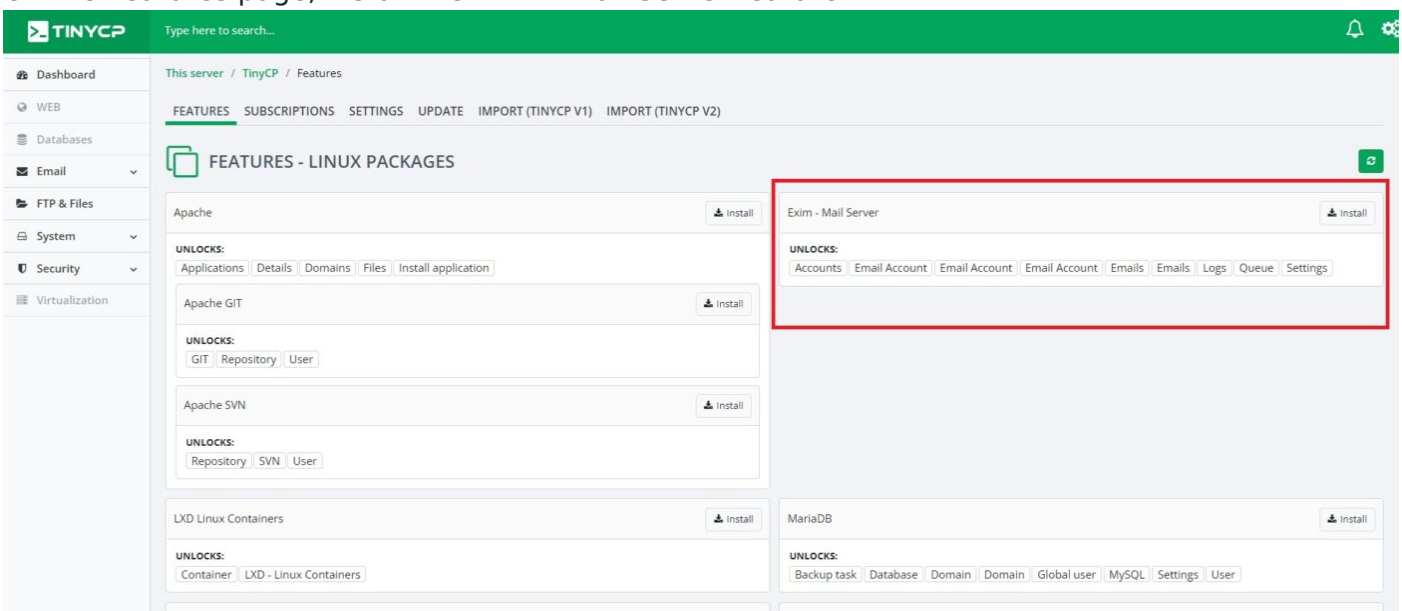

TinyCP · https://wpemailmanager.com/docs/how-to-enable-the-email-server-on-tinycp/

Do the following to enable the email server on TinyCP:

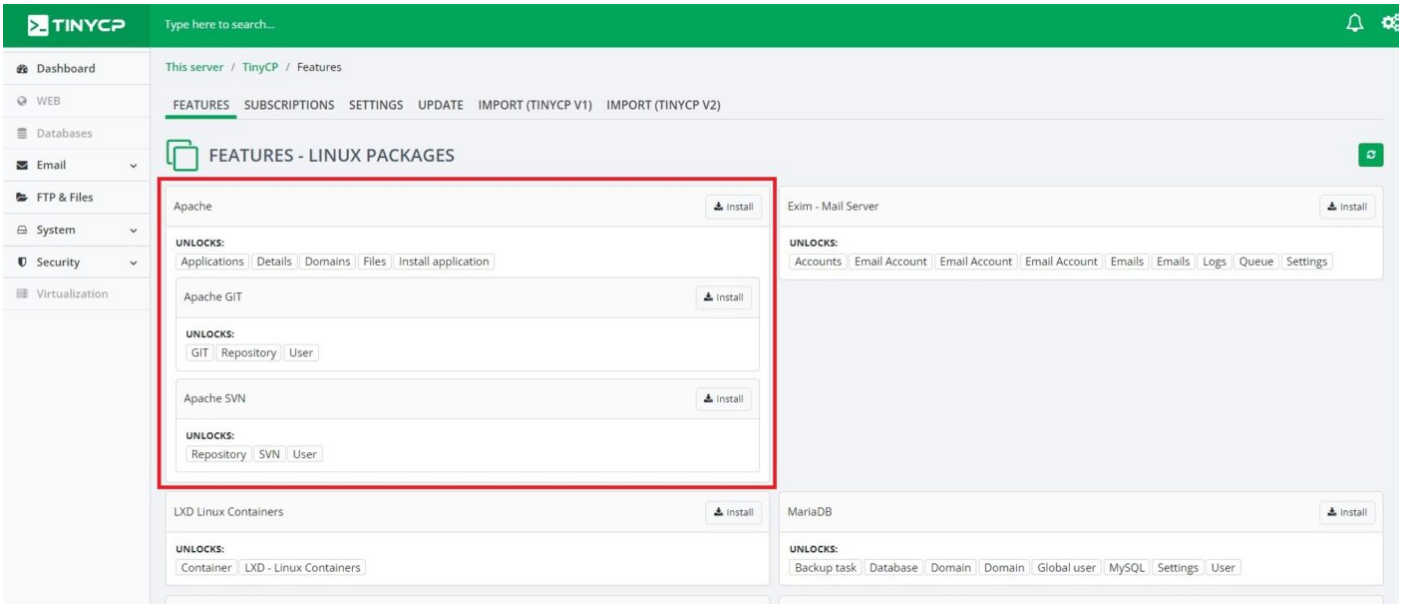

1. Login to TinyCP's admin area, and on the top right, click on the gear icon and click on features.

2. On the Features page, Install the Exim - Mail Server feature.

3. If you haven't installed Apache, also install it as it will be required in email domain management.
