How to Obtain a Cloudron API Token

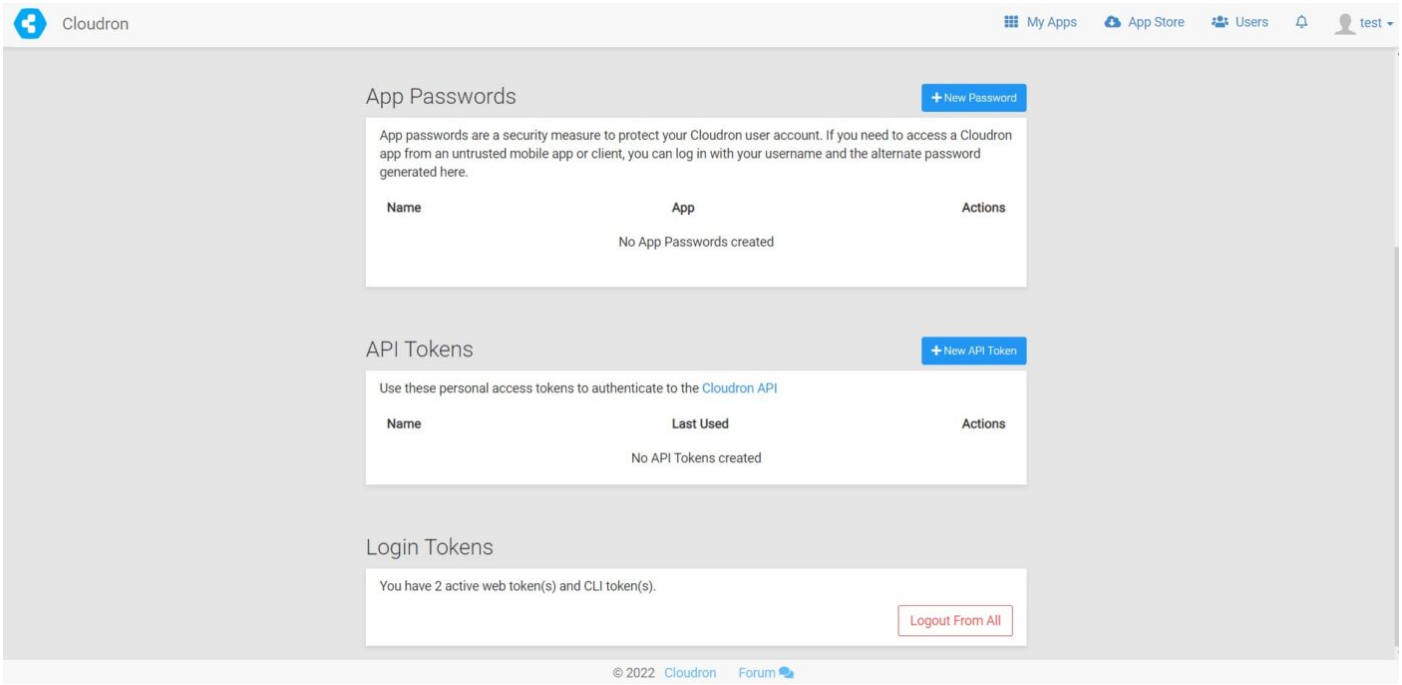

Cloudron · https://wpemailmanager.com/docs/how-to-obtain-a-cloudron-api-token/

Do the following to obtain your Cloudron API token. Before you proceed, ensure that your Cloudron account has Administrator access.

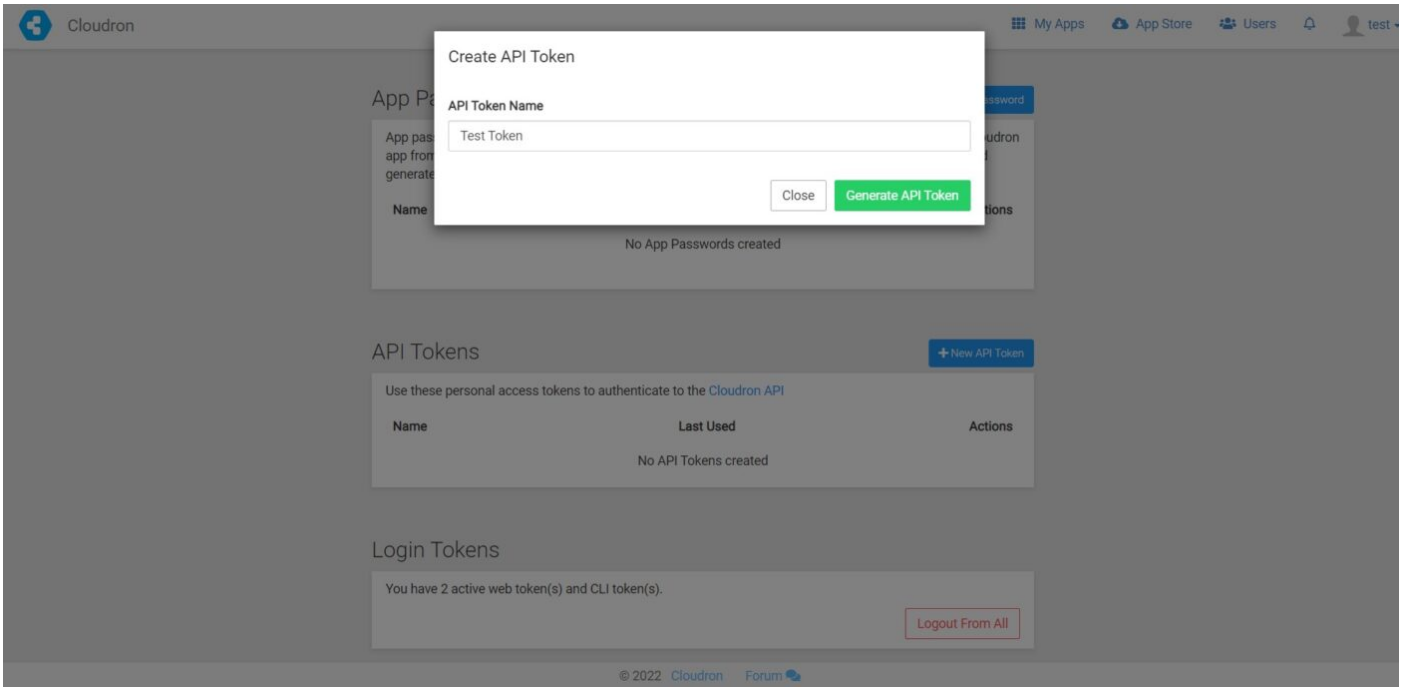

1. Login to Cloudron's admin panel.
2. On the user drop down on the top right, click on profile.

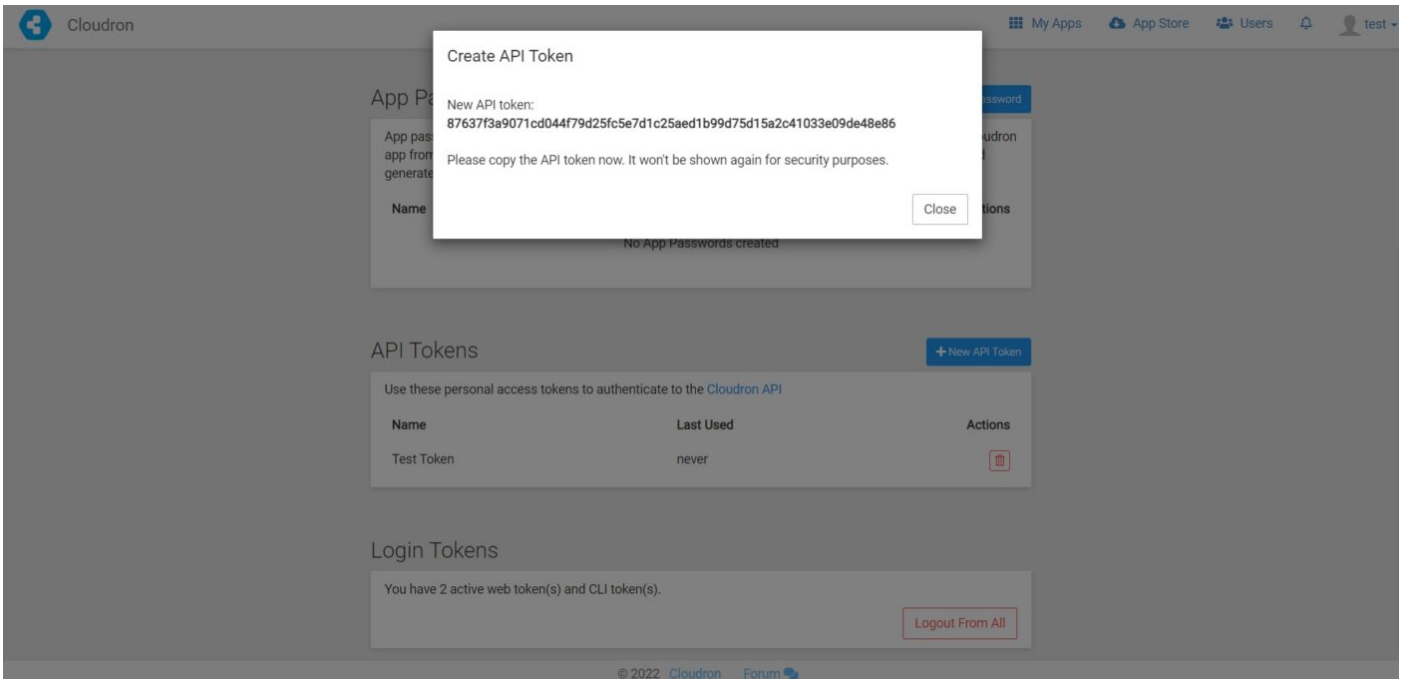

3. On the profile page, click on New API Token button.

4. Give the token a name and click on generate.

5. Save the generated token in a safe place as it won't be displayed again.
