How to Setup the Frontend Addon

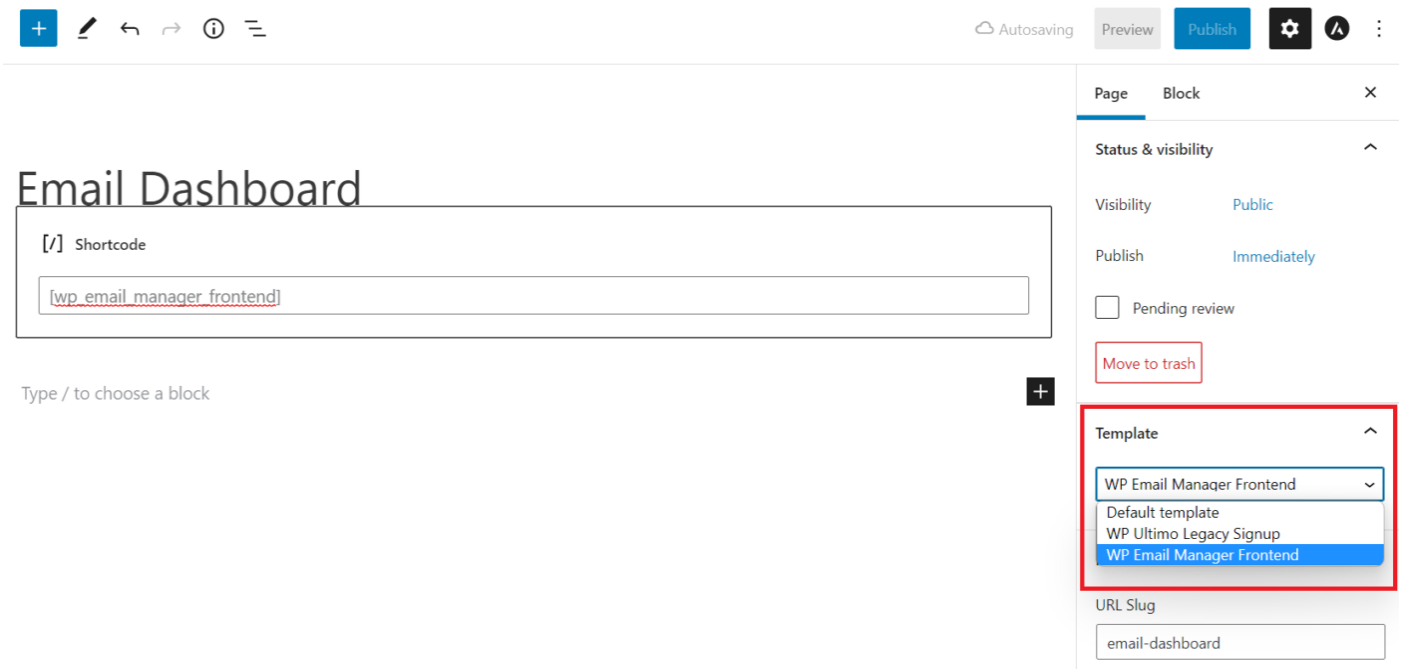

Frontend · https://wpemailmanager.com/docs/how-to-setup-the-frontend-addon/

In order to manager email accounts on the frontend of your website, the Frontend Addon is required. To setup the addon on your website, please follow this steps:

1. Ensure that you are using WP Email Manager version 1.0.8+
2. Install and activate the addon.
3. Go to Email Manager > Settings and click on the Frontend tab.
4. Select what the addon should integrate with. The choices displayed depend on your WordPress setup i.e. if WP Ultimo Integration is configured or you have WP multisite install.

5. Create a new WordPress Page by going to Pages > Add New.
6. Add the **[wp_email_manager_frontend]** shortcode.
7. On the page templates section, select the **WP Email Manager Frontend** template.

8. Email accounts should now be visible on the frontend of your website.
