License Activation & Deactivation

Settings · https://wpemailmanager.com/docs/license-activation-deactivation/

A valid license is required for you to receive support and plugin updates. If your license has expired, the plugin will still function.

The plugin's License Settings can be accessed from **Email Manager > Settings** admin menu, or network admin menu, if the plugin is Network Activated in a multisite installation.

Activate or deactivate your license as required.
