Requirements

Installation · https://wpemailmanager.com/docs/requirements/

For WP Email Manager to function efficiently, please ensure that the following conditions are met:

1. You are using WordPress V5.3+ and PHP v7.4+
2. Your integration allows you to create email accounts.
3. You have ***curl*** enabled.
4. Optional - wp-config.php is writable. If not, please refer to WP-Config Setup.
5. Optional - sunrise.php is writable. If not, please refer to Sunrise Setup.
6. Depending on your integration, its respective requirements have been met.
