Virtualmin Requirements

Virtualmin · https://wpemailmanager.com/docs/virtualmin-requirements/

For WP Email Manager to integrate with Virtualmin, the following conditions must be met:

1. You have root access to the server.
2. You know your server stack (LAMP or LEMP).
3. The domains (virtual servers) have unlimited quota. We recommend that you set the default plan to have unlimited quota.
4. You have enabled DKIM functionality. Learn more here.
